Dauphin produced bespoke acrylic mounts for most of the cases in the World View Out of Africa Gallery at the new Leeds City Museum, working closely with the curator, Antonia Lovelace and Assistant Registrar Marek Romaniszyzn. World View is on the ground floor of the new four-storey museum, which has received over 90,000 visitors in the first two months since its opening on 13th Septemeber 2008

"Dauphin's work for the Africa displays included a mount with internal rod to support the star masquerade headdress in the Introduction case, *left*. This 'Beautiful Ancestress' from the Ekoi or other Cross River people in Nigeria has a forward projecting 'hair-coil' which needed counter-balancing. For the

Costume and Craft case, *above* a long and broad acrylic sheet acted as a backboard for displaying a selection of wood, horn and clay items and a similar method was used for the personal ornaments. A shoulder mount was made for the deep beadwork collar from South Africa. Acrylic mounts also supported African musical instruments on the back wall of the music case, *below* and allowed the suspension or fixing of items in the masquerade case. The high standard of the mount work complements the quality of the African and World culture collection pieces."

Antonnia Lovelace, Curator Anthropology

The butterflies and insects were to be displayed in a tall cabinet with a central column representing a wave. This wave was constructed from a clear acrylic sheet backed on both sides with acid free fibre board which was then covered with conservation fabric.

With loving care, Claire Stringer, Curator of Natural Science, pinned on the butterflies and insects onto the board, creating a flowing design.
